Crafts & Home Décor: Stabilizers

Peltex® II

Ultra-Firm Two-Sided Fusible

Pellon® Peltex® II is an ultra-firm, double-sided, fusible stabilizer. It provides smooth, heavyweight stabilization for accessories, crafts, home decorating, and quilting. It is sewing machine safe and will not flatten out or become distorted by steam pressing. Peltex II has no grain and can be cut in any direction.

Note: Always pre-test with a swatch of your fabric prior to use to make sure it is compatible with the fusible. It is recommended to pre-wash all fabrics to remove any coatings that might interfere with the fusible. Do not use fabric softener. This interfacing does not require pre-shrinking.

General Directions:

1. Cut a section of the Peltex II so that it is slightly bigger than your framework design.
2. Cut two sections of the design fabric that are bigger than the section of Peltex II.
3. Stack the fabric with Peltex II to build a "sandwich".
4. Fuse the fabric to Peltex II using an iron set at the maximum dry level. Press the iron down firmly and using a crosswise motion, apply at least 5 seconds of continuous heat to all areas of the fabric. Allow material to cool off. Flip over fused fabric and repeat this step.
5. Trace a design on one side of the fabric and then cut it out.
6. To permanently set design, press fabric with a hot iron on both sides and steam.

Tips:

- When fusing paper to Peltex II, use press cloth between the iron and the paper to prevent burning. Do not use steam when fusing paper and Peltex II.

Fiber Content: 100% Polyester
Care Instructions: Machine wash with cold water on gentle cycle. Tumble dry on low heat.

Manualidades y Decoración Del Hogar: Estabilizadores

Peltex® II

Entretela Ultra Firme de Fusión Doble Faz

Pellon Peltex® es una entretela estabilizadora ultra firme de fusión doble faz. Esta entretela refuerza y proporciona suavidad a los accesorios, manualidades, decorados para el hogar y acolchados. Es adecuado para utilizar en máquinas de coser y no se aplanará, ni se deformará al planchar al vapor. Pellon II no tiene textura y se puede cortar y aplicar en cualquier sentido.

Nota: Siempre realice una prueba en un pedazo de tela antes de usar para verificar que la tela es compatible con el adhesivo.

DIRECCIONES DE USO:

1. Cortar una parte de Peltex II que sea un poco más grande que el área del diseño deseado.
2. Cortar dos retazos de la tela a utilizar que sean un poco más grandes que la pieza de Peltex II.
3. Apilar la tela contra Peltex II y crear un "emparedado".
4. Fuse the fabric to Peltex II using an iron set at the maximum dry level. Press the iron down firmly and using a crosswise motion, apply at least 5 seconds of continuous heat to all areas of the fabric. Allow material to cool off. Flip over fused fabric and repeat this step.
5. Trace a design on one side of the fabric and then cut it out.
6. To permanently set design, press fabric with a hot iron on both sides and steam.

Sugerencia:

- Cuando Peltex II sea adherido al papel, cubrir con un paño húmedo para evitar que el papel se queme. No use vapor cuando adhiera Peltex II al papel.

Contenido de Fibra: 100% Poliéster
Instrucciones de Mantenimiento: Lavar a máquina en agua fría, en ciclo delicado. Secar en temperatura baja.
