Halloween Paper Bag Luminaries Skill Level: Easy

Designed By
Heather Parsons
www.SmallFryandco.blogspot.com

This is a simple and spooky project to add your Halloween decorations. Luminaries will help guide trick-or-treaters to your door.

Materials Needed

White Paper Lunch Bags
Black Fabric
725 Heavy Duty Wonder-Under[®]
Patterns of your choosing

Tools Needed

Scissors or Exacto Knife
Tea light or battery powered light
Iron
Sand (optional)

Instructions

Step 1: Begin with the pattern you want to trace. Example shown uses Owl.

Step 2: Cut a piece of 725 Heavy Duty Wonder-Under® slightly larger than your pattern. Trace pattern onto Heavy Duty Wonder-Under®.

Step 3: Fuse Heavy Duty Wonder-Under® to the wrong side of your fabric. Cut out on lines and cutout any small details. We recommend using an Exacto knife.

Step 4: Peel off the paper backing of the Heavy Duty Wonder-Under® and fuse pattern to the paper bag.

Step 5: Place sand at the bottom of your bags for stability then add your Tea lights or battery operated light.

Step 6: Place around walkway or driveway for a spooky guided entrance for your trick-or-treaters!
